Estimate Details

Dual tankless :

In this option we will replace both tank style water heaters with two tankless water heaters that will provide endless hot water. We will install two Navien 240a2 in the attic on a custom wood frame. We will install service valves to allow for easy annual maintenance. We will have tankless water safety pans under water connection to heater and re utilize leak prevention valves. We will delete existing recirc pump and utilize the internal recirc pump that is featured with the Navien 240a2. During removal of tank type heaters, we will lay drop cloth from attic space to front door to prevent any damage to property.

To provide the endless hot water with tankless style heaters we will need to upsize our gas line to accommodate higher volume of gas consumption. Despite needing more volume of gas, these heaters are more efficient because they only heat water when it is called for at any fixture in home.

4 year warranty from crows plumbing service

Task #	Description	Quantity	Your Price	Your Total
